

Student comments regarding the Business Associates Sponsored 2012 Field Trip to the RSA Conference – the place where the world talks Security

- The expo was great! So many things to learn!
- This experience helped me realize the career field that is best for me!
- This conference helped me learn the hot topics in the industry and allowed me to grasp the scope of the industry
- Learning at its best, priceless experience
- Extremely eye opening. One vendor mentioned the demand for IT security professionals. Perhaps CSUF needs to have security IT based classes to fill demand.
- This is a great conference especially because I am an IS student and I met many companies that offer a variety of ways to secure information technology.
- Great learning experience. Gives future towards career after college.
- The conference was an amazing experience. I wasn't aware of all the security breaches available for our everyday use of devices. Now I am more knowledgeable of these important aspects. Thanks so much for giving us the opportunity to learn and explore about security breaches.
- As always, the RSA conference is an eye-opener regarding software and hardware security. Technology is becoming more advanced each day, however, security prevention is always lacking. RSA really emphasizes the importance of that. Look forward to attending future conferences.
- The exposure to the latest security there and the solutions provided by the many vendors at RSA was a truly invaluable experience.
- It was an amazing experience. Being an electronics engineer, I found things that interest me and also can help me in the near future. Good exposure to network security giants in the world and understand their products.
- The RSA conference was very informative. I did not know that there were so many different companies. It was good to know about the many different ways to defend against threats.
- I enjoyed the RSA conference, this is my second time attending and I found it more informational than the last one. I learned a lot about security and the cloud; I'm looking forward to our next convention.

- The RSA Conference was an eye-opening experience. As a liberal studies major, I found the entire experience to be very interesting and enlightening- really gave me a new perspective on the concept of info system security and the possible careers in that field.
- The conference really exposed me to a vast number of companies and how broad computer security is. It is more than just passwords. It is encryption, DLP, hardware, and much more. I am really excited to go home and do more research on the companies and concepts I have been exposed to.
- The RSA Conference was a real eye-opener to the many possibilities for IS security careers. I learned a lot about exploiting secrets and the ways that IS systems are explored for exploits in a productive manner. I really enjoyed it and would like to see more next year.
- RSA Conference was a great experience for me. It gave me a deep understanding of how security works in real world applications, Thanks to Dr. Moffitt for such an opportunity to experience the importance of security capabilities that are crucial for success in businesses.
- I was able to attend a talk by David Brooks, an opportunity I would not have had otherwise. The keynotes were more than worth it.
- For me, RSA gives an opportunity to see what's going on in the realm of IT security. Found it very useful for networking and getting exposure to new things.
- I enjoyed the keynote from David Brooks. It gave me insight on how to improve myself. I learned security is a huge field in the IT career. I have more knowledge on security than I did before.
- The RSA Conference is highly informational and keeps us students updated about the latest technology and on this visit I came to know about the security systems and also got a chance to interact with some really talented people. I think it was great and look forward to such events in the future.
- The RSA Conference enabled me to see the many opportunities that exist in the security industry. Seeing experts work so hard on something to help an entire community is really inspiring. Being able to participate in a conference like this really broadened the career field I plan to look into.
- RSA Conference was a great experience for me. It gave me a chance to learn and discover new technology experts. It's motivating as well - seeing all these people work to accomplish some good.
- The RSA Conference made me appreciate my major! I currently take database. It was a special moment when I met two Oracle executives who gave me a signed copy of their book on securing an Oracle database.

- I really enjoyed attending the RSA Conference. I was able to meet many professionals that gave me good insights into the world of security. I look forward to attending these conferences in the future.
- The RSA Conference was such an amazing experience (not just because I won a helicopter), but because I got to meet such awesome exhibitors and guests!
- The conference was great because I got to talk to prospective employees and learn more about the specialty I want to go into.
- RSA means the world to me because it lets me see what companies are hiring and allows me to give out my résumé.
- This was our first time attending the RSA conference and we had a great experience. We were exposed to the latest and greatest in system security. It is an absolutely wonderful opportunity for all those interested in information systems or technology. Thank you very much.
- The RSA conference was beneficial in that it gave me a taste of what the security of IT is. I felt I learned a lot from various security professionals at the conference. The keynote speakers were very interesting and who I strive to be like in the professional world.
- The trip really got me interested in the security field. I think it is a great trip for future students. I enjoyed the presentations.
- RSA Conference is very interesting for us. We learned that security solution was very important to our lives.
- Wow! What an experience! I was amazed how many security firms for so many security reasons. The speakers gave insight to the future. Security will be “more” at the fore-front with each generation. We cannot afford to lack on security!
- I always enjoy coming to the RSA Conference. I get to see and try all the latest security technologies on the market. I’m sure I will be coming back next year!
